We make shadow payroll simple for your clients

certino

Shadow payroll is an essential service in today's increasingly mobile world. As a service provider, offering automated shadow payroll as part of your payroll service to your customers puts you ahead of your competition. However, navigating the complexities of international laws to calculate shadow payroll can be time-consuming, error-prone and high-cost.

Our deep understanding of shadow payroll is ready to work for you.

Here's how...

Save time

Challenge:	Solution:
Disconnected systems	Connect your business tools with one, easy to integrate solution.
Slow, Manual service	Free up team time and delight clients with rapid calculations, returned in seconds, not days.
Lack of shadow payroll expertise	Benefit from a specialist in-house tax team, dedicated to keeping abreast of legislative changes.

Save costs

Challenge:	Solution:
Inaccurate calculations	Provide clients with accurate, real-time calculations - rather than estimates.
Expensive 3rd party support	Tailor the level of collaboration to suit your business needs and to avoid unnecessary costs.

Stay compliant

| Challenge:	Solution:
Manual service & 3rd party costs	Provide shadow payroll as a service to clients, without adding to your administrative burden.
Compliance risks	Mitigate the reputational risk and financial costs of penalties from tax audits (for your customer, their employees and yourself).

We make shadow payroll simple

Whether you need a fully-managed solution or autonomous access to our platform, we tailor our support to your needs.

- Tax specialists to accompany use of our tax engine - training, integration support and dedicated customer support.
- Enhance your overall shadow payroll process with additional expert consultancy services.
- Support available to you and your end customer depending on the partnership requirements.
